"The Best Way to Predict the Future is to Create it."

Summary

Full-stack Developer with over **7 years of experience** in designing, developing, and scaling web applications. Specializing in **Ruby on Rails** and modern **JavaScript frameworks** (React, Next.js), I help companies **build, scale, and evolve** digital solutions. Skilled in Agile methodologies, CI/CD pipelines, and API integrations, I deliver robust, secure, and high-performance software with a strong focus on **code quality, execution, and business impact**. Known for a **proactive, ownership-driven, and solution-oriented** mindset, I thrive in fast-paced environments—from early-stage projects and startups to high-growth scale-ups.

Work Experience

Abbove (PaxFamilia) – WealthTech

Brussels, Belgium – Remote

SENIOR RUBY ON RAILS ENGINEER

Jul. 2025 – Present (9 mos)

- Designed and shipped a full-stack geographic allocation system for investment portfolios — data model, backend services, API, multi-pie chart visualizations, and forms — rolled out progressively via feature flags to institutional clients (BNP Paribas).
- Built a temporal ownership period engine for asset valuations, enabling time-based ownership tracking with perspective-aware percentage computations across a complex multi-tenant estate planning platform.
- Developed private markets analytics services and liability value tracking with time-series interpolation for historical chart visualizations.
- Maintained and hardened third-party banking integrations (Powens, Flanks) for portfolio synchronization, with comprehensive integration test suites.
- Systematically refactored legacy code: extracted shared concerns, service objects from fat controllers, and simplified the valuation calculation engine — 32k+ lines removed.
- Authored and executed multi-tenant data migrations with tenant-specific rollout strategies, and fixed critical valuation bugs (ownership percentages, bigint monetary amounts).
- Extended the reporting engine with new table types, columns, and widgets across investment and insurance portfolio views.

Climb (ex Tacotax) – FinTech

Paris, France – Hybrid

SENIOR RUBY ON RAILS ENGINEER

Jan. 2023 – Present (2 yrs 3 mos)

- Migrated the codebase from Rails 6 to Rails 7.2 and eliminated legacy components in line with a new business model.
- Built CI/CD pipelines with custom deployment scripts to automate and streamline releases.
- Implemented business-critical B2B API integrations and integrated Stripe for secure payment processing.
- Connected external partner APIs with Salesforce to sync real-time client contract data.
- Linked Salesforce data to the front-end for a seamless, data-rich user experience.
- Reduced frontend and backend errors to zero in Rollbar through proactive debugging and monitoring.
- Improved API response time and system performance through targeted code and query optimizations.
- Contributed to ClimbGPT, an AI-powered assistant for tax and investment guidance using OpenAI's API.

Doctolib – MedTech

Paris, France – Hybrid

FULLSTACK RUBY ON RAILS & REACT ENGINEER

Jun. 2020 – Dec. 2022 (2 yrs 6 mos)

- Built the core prescription app used by all physicians in France, in a cross-functional feature team.
- Applied best practices including Pair/Mob Programming, TDD, and Code Reviews.
- Maintained high test coverage using Minitest and Capybara to ensure feature reliability.
- Collaborated with PMs to define specs, milestones, and technical documentation.
- Trained new engineers on Rails and React; supported team onboarding.
- Participated in Dev Duty with daily production deployments (3x/day).

Lingu.Africa – ContentTech

REACT/NEXT.JS DEVELOPER & FOUNDER

Remote

Mar. 2021 – Present (3+ yrs)

- Built a multilingual e-commerce platform for 180+ self-published children's books.
- Created a dynamic blog system with markdown-to-HTML conversion and SEO optimization.
- Automated catalog updates, analytics, and AI-generated blog publishing (21k+ word posts with dynamic images).
- Achieved high SEO ranking using programmatic pages, metadata, sitemaps, and OpenGraph.
- Handled all architecture, design, and deployment using Next.js and TypeScript.

Workelo – HRTech

RUBY ON RAILS SOFTWARE ENGINEER

Paris, France – On-site

Jul. 2019 – Jun. 2020 (11 mos)

- Refactored and scaled the internal mailing system to improve reliability.
- Built CI/CD pipelines with GitHub Actions and CircleCI.
- Introduced unit and integration testing, and trained team on test practices.
- Maintained code quality using RuboCop, SimpleCov, CodeClimate, and Brakeman.

Le Wagon – EdTech

RUBY ON RAILS INSTRUCTOR

Paris, France – On-site

Jan. 2019 – Jun. 2019 (5 mos)

- Taught full-time web development students Ruby, OOP, and Rails fundamentals.
- Led hands-on sessions and guided project teams on best practices.

Joinly – SportsTech

RUBY ON RAILS ENGINEER

Paris, France – On-site

Jan. 2018 – Jan. 2019 (1 yr)

- Built a SaaS platform to manage referee payments with S-Money API integration.
- Implemented CI pipelines with CircleCI and GitHub Actions.
- Maintained code quality using security and performance analysis tools.

Covage – Telecommunications

SOFTWARE & NETWORK ENGINEER

Paris, France – On-site

Feb. 2015 – Sept. 2017 (2 yrs 7 mos)

- Automated network service deployments and configuration audits.
- Implemented infrastructure-as-code and reduced manual operations.
- Managed the product backlog, mentored interns, and led feature development.

Skills

Programming Ruby, JavaScript

Back-end Ruby on Rails, PostgreSQL, Redis, Sidekiq, API Integration

Front-end Reactjs, Nextjs

DevOps & Deployment GitHub Actions, Heroku, Vercel, CircleCI

Testing & QA RSpec, Minitest, Capybara

Languages Spoken French, English, Kirundi

Education

Le Wagon

FULL-STACK WEB DEVELOPER, COMPUTER PROGRAMMING

Paris, France

Sep. 2017 - Dec. 2017 (3 mos)

Nanyang Technological University

COMPUTER ENGINEERING, EXCHANGE SEMESTER

Singapore

Jun. 2013 - Dec. 2013 (6 mos)

Université de Technologie de Troyes

NETWORK ENGINEER'S DEGREE, COMPUTER SYSTEMS NETWORKING AND TELECOMMUNICATIONS

Troyes, France

Sept. 2011 - Sept. 2014 (3 yrs)

Université de Lille I, Sciences et Technologie

COMPUTER SCIENCE

Lille, France

Sept. 2009 - Sept. 2011 (2 yrs)
